

“Web Print” Services

Effective 2-4-2011

Thank you for your interest in our Web Based Label Printing Solution. The current offering focuses on specific industry labeling requirements such as the Automotive and Transportation Industry's. This site offers standard AIAG label formats such as the B-10 Transportation Label and B-16 Global Shipping Label, as well as specific OEM label requirements.

“Web Print” provides a low cost solution to print OEM shipping labels for such companies as American Axle, Ford, GM, Harley Davidson, Honda, Toyota, etc... Web Print also provides first and second tier suppliers a means of printing their receiving labels as part of their Supply Chain Management solution.

The product requires the user to be able to access the Internet with Microsoft Internet Explorer and either a Windows based printer, a Zebra or Intermec thermal/thermal transfer printer.

If you don't see your customers specific label requirements in the OEM selection list, e-mail us the specifications and we will work with you to host and display them.

Free Hosting of Label Specifications within the Edibar Community

Any OEM or first tier supplier that uses the Automotive Industry Action Groups AIAG B-10 or AIAG B-16 shipping label formats may submit their written specifications to Edibar Systems for implementation and printing over the web service.
